

## **PORTFOLIO PROJECTS**

### **ART 3 =(Attached are examples of how to approach the drawings)**

Each drawing must be done using graphite pencil on a sheet of white paper measuring 16 x 20"; other drawing materials should not be used. Each drawing should take about 12 hours. Choose two out of the three. First project of choice due end of 1<sup>st</sup> semester, second project of choice due end of 2<sup>nd</sup> semester. I will check the project during end of term1 and 3 and offer suggestions.

#1. The drawing must represent a bicycle or tricycle. Well rendered realistic drawing with close observation. Start by drawing the negative space first. Make sure there is consistent lighting. Think of dynamic composition

#2. Draw 4 Gatorade bottles in many different perspectives and sizes on one piece of paper. Make sure that there are at least 10-15 ellipses visibly drawn inside/through the bottle. Make sure the bottle looks transparent with value transitions.

#3 Draw a self- portrait using structural forms. Use a mirror. Make sure there is consistent lighting for intense contrast in value.

**\*\*Students are allowed to borrow any material for their independent project and take them home. When they complete the project, they will hand in the materials.**
